

Credit Score Monitoring & Drift Assessment

Report Cycle: Q4 2011 Model Performance Review
Focus: Stability & score migration matrices

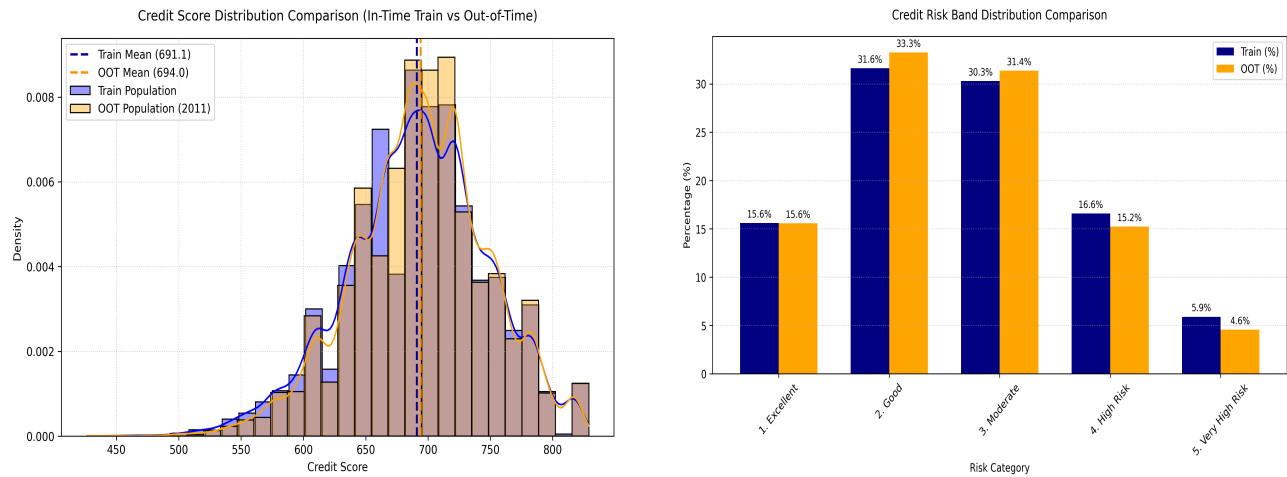

1. Stability Index Summary

To ensure model stability, Population Stability Index (PSI) and Characteristic Stability Index (CSI) are calculated. The total score PSI was **0.0091**. Since this value is below 0.10, the portfolio distribution remains highly stable and does not trigger model retraining.

Characteristic Stability Index (CSI) Rankings:

Characteristic (Variable)	CSI Value	Stability Status
loan_amnt	0.0279	Stable
annual_inc	0.0073	Stable
dti	0.0149	Stable
revol_util	0.0142	Stable
delinq_2yrs	0.0002	Stable
inq_last_6mths	0.0080	Stable

2. Score Distributions & Migration Analyses

3. Quarterly Score Migration Matrix (2011 Cohort)

This table shows the percentage distribution of active accounts across risk bands between early 2011 (H1) and late 2011 (H2), providing visibility into portfolio risk transitions.

Cohort	1. Excellent	2. Good	3. Moderate	4. High Risk	5. Very High Risk
H1_2011	16.71%	34.28%	29.87%	14.48%	4.67%
H2_2011	14.69%	32.47%	32.55%	15.82%	4.46%
